These parts should be built directly on top of the just-built lower rear wall. The entire model is not shown here as it is visually very "cluttered" and difficult to see new parts being placed.

** Review Step 76 and then come back and continue **

136

For simplicity, this Bat Computer has been built with blank, black screens (tiles). For a more appealing module, replace these tiles with other screens, panels or keyboard tiles you may already have in your collection.

137

Once the Bat Computer is attached to the module body, you will need to rotate it at this connection, to position it level with the ground.

138

139

140

Stunt-double for instruction purposes only.

Replace with a real hero!

141

"It's only the end if you want it to be." - Batgirl.
Enjoy your new module!

Module Revision Notes

Version 1.0 - Initial Release

Version 1.1 - Changed the motor and gear assembly, resulting in the wheel rotating in the correct direction when a train controller is turned clockwise, as is the preferred use at collaborative GBC displays. -- 02-Jan-19
