

TRIPLE SPLAT LOADER

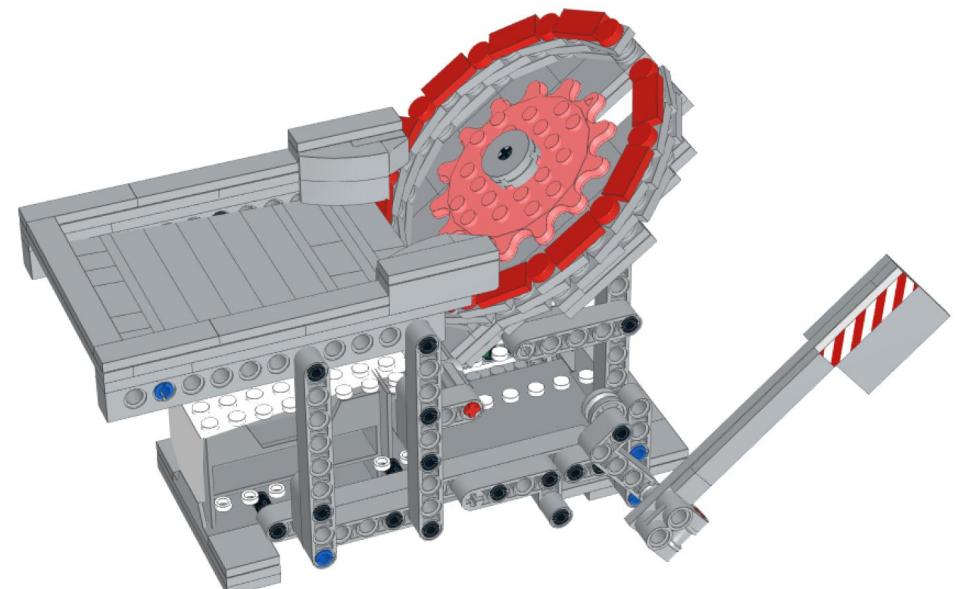

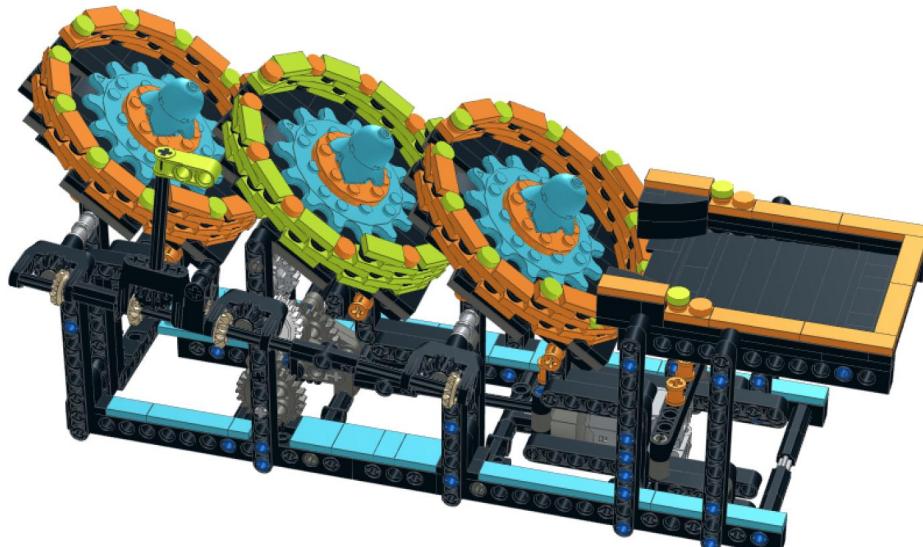

Copyright 2019 Ryk Field

<https://creativecommons.org/licenses/by-nc/4.0/>

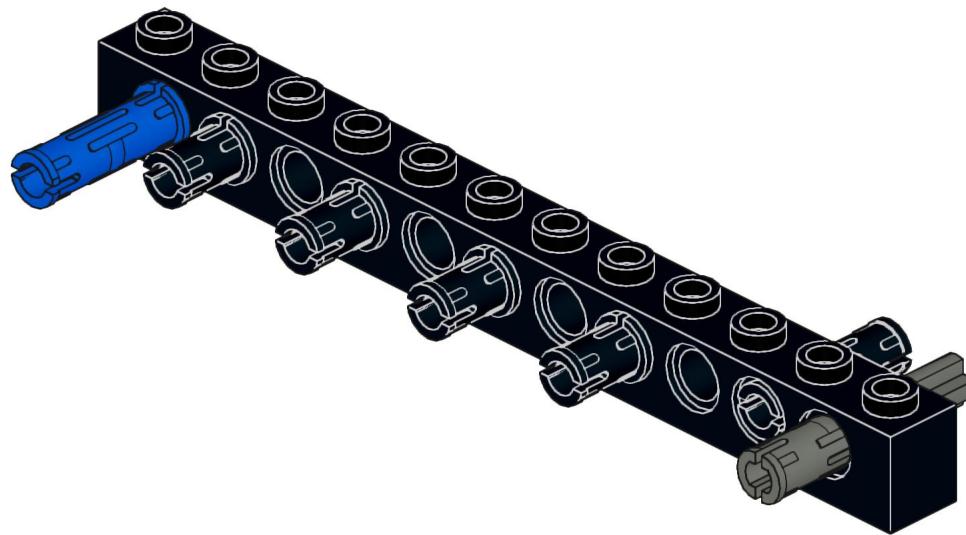

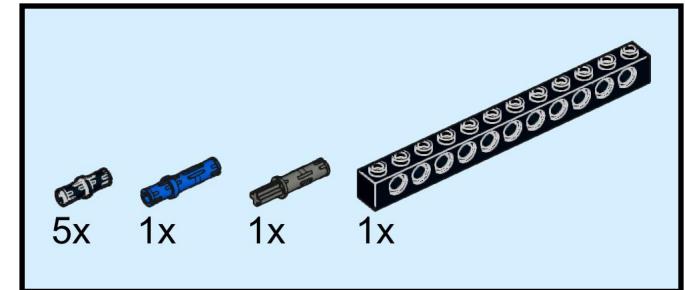

The Triple Splat Loader is a modified version of the loading ramp designed by Akiyuki for his GBC module: Cars with adaptive cruise control. The input tray and loading wheel are retained, with some alterations. The supporting structure, motor (Power Functions "L") and motorization have been significantly altered. The Triple Splat Loader is my take (among several already) of a more typical, standalone module.

If you haven't seen the Akiyuki original in action, you can find it at the website listed below.
