REF 09

INSPIRATION

A rotating, circular truss is commonly used in stage lighting at Performing Arts venues. These lighting trusses reminded me of a ring of rollercoaster track (25061) and I began to wonder how they might be used in a Great Ball Contraption.

MOTIVATION

The 2019 Great Ball Pit Challenge was to build a module based around a rotating ring structure, able to move balls around the ring, in an "up and over" motion, similar to a ferris wheel.
